

3mm Advanced Super Flux LEDs

10-01-C84-YSC-AAS2T2DH-AM

Lead (Pb) Free Product- RoHS Compliant

Feature

- Piranha package.
- Colorless clear resin.
- Low thermal resistance.
- Packaged in tubes for Automatic Insertion Equipment.
- Total Flux: 5650 to 11250 mlm at 70mA.
- Qualification according to AEC-Q101.
- Compliance with EU REACH.
- Compliance Halogen Free .(Br <900 ppm ,Cl <900 ppm , Br+Cl < 1500 ppm).

Applications

- Automotive Lighting
- Electronic signs and signals
- General lighting application

Device Selection Guide

Chip	Emitted Color	Resin Color

EVERLIGHT

Product Nomenclature

10	-	01	-	C8	4	-	YS	C	-	AA	S2T2	D	H	-	AM
1		2		3	4		5	6		7	8	9	10		11

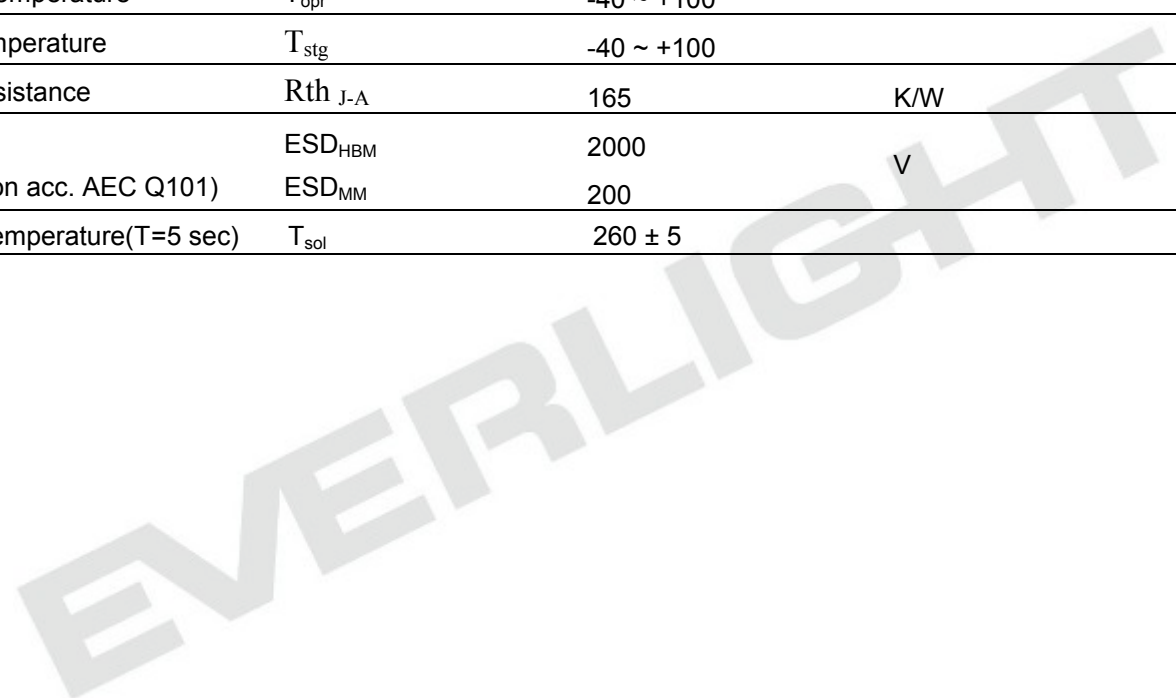

The product name is designated as below:

1.	Product type
2.	Lead-frame type
3.	Angle
4.	Product pasted without Zener
5.	Chip code
6.	Resin color
7.	Wavelength
8.	Power &Luminous Intensity
9.	Range of Forward Voltage specification
10.	Operation current
11.	Application

Absolute Maximum Ratings (Ta=25)

Parameter	Symbol	Rating	Unit
Reverse Voltage	V_R	5	V
Continuous Forward Current	I_F	70	mA
Peak Forward Current (Duty 1/10 @1KHz)	I_{FP}	100	mA
Power Dissipation	P_d	200	mW
Junction Temperature	T_j	115	
Operating Temperature	T_{opr}	-40 ~ +100	
Storage Temperature	T_{stg}	-40 ~ +100	
Thermal Resistance	$R_{th\ J-A}$	165	K/W
ESD (Classification acc. AEC Q101)	ESD_{HBM} ESD_{MM}	2000 200	V
Soldering Temperature(T=5 sec)	T_{sol}	260 ± 5	

Electro-Optical Characteristics (Ta=25)

Parameter	Symbol	Min.	Typ.	Max.	Unit	Condition
Total Flux	Φ_v	5650	---	11250	mlm	$I_F = 70\text{mA}$
Peak Wavelength	λ_p	----	594	----	nm	$I_F = 70\text{mA}$
Dominant Wavelength	λ_d	589	---	598	nm	$I_F = 70\text{mA}$
Spectrum Radiation Bandwidth	$\Delta\lambda$	----	15	----	nm	$I_F = 70\text{mA}$
Viewing Angle	$2\theta_{1/2}$	----	130	----	deg	$I_F = 70\text{mA}$
Forward Voltage	V_F	1.9	---	2.9	V	$I_F = 70\text{mA}$
Reverse Current	I_R	----	----	10	μA	$V_R = 5\text{V}$

Note:

1. Tolerance of Total Flux: $\pm 11\%$
2. Tolerance of Dominant Wavelength: $\pm 1\text{nm}$
3. Tolerance of Forward Voltage: $\pm 0.1\text{V}$

Bin Range of Dominant Wavelength

Bin	Min.	Max.	Unit	Condition
2	589	592	nm	I _F =70mA
3	592	595		
4	595	598		

Note:

Tolerance of Dominant Wavelength: ± 1 nm

EVERLIGHT

Bin Range of Forward Voltage

Bin	Min.	Max.	Unit	Condition
1	1.9	2.1	V	$I_F = 70\text{mA}$
2	2.1	2.3		
3	2.3	2.5		
4	2.5	2.7		
5	2.7	2.9		

Note:

Tolerance of Forward Voltage: $\pm 0.1\text{V}$

EVERLIGHT

Bin Range of Total Flux

Bin	Min.	Max.	Unit	Condition
S2	5650	7150	mlm	$I_F = 70\text{mA}$
T1	7150	9000		
T2	9000	11250		

Note:

Tolerance of Total Flux: $\pm 11\%$

EVERLIGHT

Typical Electro-Optical Characteristics Curves

Typical Curve of Spectral Distribution

Note: $V(\lambda)$ =Standard eye response curve; $I_F = 20\text{mA}$

Diagram Characteristics of Radiation

Package Dimension

Note: 1. Tolerances unless mentioned ± 0.25 mm. Unit = mm

2. An epoxy meniscus may extend about 1.5 mm (0.059 ") down the leads

Antistatic Packing Materials

Tube

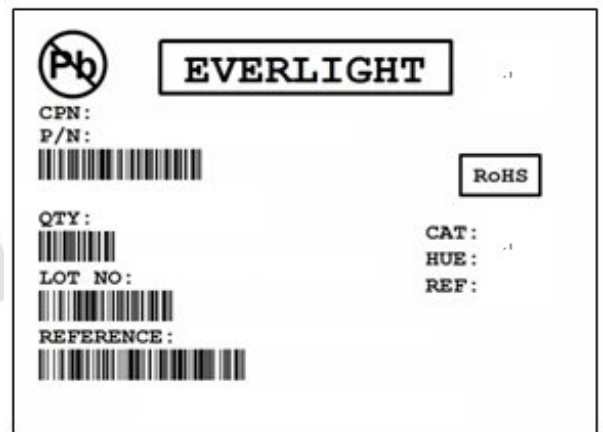

EVERLIGHT	PART NO:	CAT:
	LOT NO:	QTY:

Tube Label Explanation

- QTY: Packing Quantity
 - LOT No: Lot Number
 - CAT: Rank of (VF)(Note*1)(Note*2)
- Note1: λ_d /CIE/Color temperature
Note2: Luminous Intensity/ Total Flux

Note: Tolerances unless mentioned ± 2.0 mm. Unit = mm

Standard Box

Outer Label Explanation

- CPN: Customer's Product Number
 - P/N: Product Number
 - QTY: Packing Quantity
 - CAT: Rank of (VF)(Note*1)(Note*2)
- Note1: λ_d /CIE/Color temperature
Note2: Luminous Intensity/ Total Flux
- HUE/REF: Reference
 - LOT No: Lot Number

Note: Tolerances unless mentioned ± 3.0 mm. Unit = mm

Packing Quantity

Packing material	Length × Width × height (mm)	Tube Quantity (Pcs)	LED Quantity (Pcs)
Tube height	640 x 9.5 x12	1	80
Standard box	682 x 128 x 45	36	2880
Large box	702 x 420 x 164	324	25920

Note:

1. Normal packing specification is use standard box, unless already defined initially.
2. Vacuum packing with anti-static bag after packing in standard box.
3. Specifications are subject to change without prior notice.

Notes

1. Lead Forming

- During lead formation, the leads should be bent at a point at least 3mm from the base of the epoxy bulb.
- Lead forming should be done before soldering.
- Avoid stressing the LED package during leads forming. The stress to the base may damage the LED's characteristics or it may break the LEDs.
- Cut the LED leadframes at room temperature. Cutting the leadframes at high temperatures may cause failure of the LEDs.
- When mounting the LEDs onto a PCB, the PCB holes must be aligned exactly with the lead position of the LED. If the LEDs are mounted with stress at the leads, it causes deterioration of the epoxy resin and this will degrade the LEDs.

2. Storage

- The LEDs should be stored at 30°C or less and 60%RH or less after being shipped from Everlight and the storage life limits are 3 months. If the LEDs are stored for 3 months or more, they can be stored for a year in a sealed container with a nitrogen atmosphere and moisture absorbent material.
- Please avoid rapid transitions in ambient temperature, especially, in high humidity environments where condensation can occur.

3. Soldering

- Careful attention should be paid during soldering. Solder the LED no lower than 1.6mm from the base of stopper is recommended.
- Avoiding applying any stress to the lead frame while the LEDs are at high temperature particularly when soldering.
- Recommended soldering conditions:

Hand Soldering		DIP Soldering	
Temp. at tip of iron	300 Max. (30W Max.)	Preheat temp.	100 Max. (60 sec Max.)
Soldering time	3 sec Max.	Bath temp.	260 Max.
Distance	No lower than 1.6mm from the base of stopper	Bath time.	5 sec Max.
		Distance	No lower than 1.6mm from the base of stopper

- Dip and hand soldering should not be done more than one time.
- After soldering the LEDs, the epoxy bulb should be protected from mechanical shock or vibration until the LEDs return to room temperature.
- A rapid-rate process is not recommended for cooling the LEDs down from the peak temperature.
- Although the recommended soldering conditions are specified in the above table, dip or handsoldering at the lowest possible temperature is desirable for the LEDs.
- Wave soldering parameter must be set and maintain according to recommended temperature and dwell time in the solder wave.

4. Cleaning

- When necessary, cleaning should occur only with isopropyl alcohol at room temperature for a duration of no more than one minute. Dry at room temperature before use.
- Do not clean the LEDs by the ultrasonic. When it is absolutely necessary, the influence of ultrasonic cleaning on the LEDs depends on factors such as ultrasonic power and the assembled condition. Ultrasonic cleaning shall be pre-qualified to ensure this will not cause damage to the LED

5. Heat Management

- Heat management of LEDs must be taken into consideration during the design stage of LED application. The current should be de-rated appropriately by referring to the de-rating curve found in each product specification.
- The temperature surrounding the LED in the application should be controlled. Please refer to the data sheet de-rating curve.

6. ESD (Electrostatic Discharge)

- Electrostatic discharge (ESD) or surge current (EOS) can damage LEDs.
- An ESD wrist strap, ESD shoe strap or antistatic gloves must be worn whenever handling LEDs.
- All devices, equipment and machinery must be properly grounded.
- Use ion blower to neutralize the static charge which might have built up on surface of the LEDs plastic lens as a result of friction between LEDs during storage and handing.

7. Other

- Above specification may be changed without notice. EVERLIGHT will reserve authority on material change for above specification.
- When using this product, please observe the absolute maximum ratings and the instructions for using outlined in these specification sheets. EVERLIGHT assumes no responsibility for any damage resulting from use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.
- These specification sheets include materials protected under copyright of EVERLIGHT corporation. Please don't reproduce or cause anyone to reproduce them without EVERLIGHT's consent.
